

QUICK JIBS

WS50-MB MOUNTING BASE DOUBLES AS BOOM MOUNT

WS50 steel track or WA50 extruded aluminum track can easily and inexpensively be hung on standard 3" OD vertical columns to make jibs or rail supports. Height is fully adjustable. More than one "boom" can be mounted to each column, as shown in inset, below, or two booms can support longer track. May also be hung overhead using WS00-CC ceiling mounting columns. Maximum boom length with one end supported, 3'. Maximum capacity, 50 lbs.
