# Industrial Duty Festoon Systems

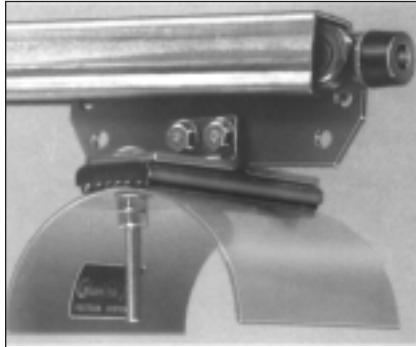

## Series C40-C and C50-C

Designed for hose or round cable with 0.31"-2.38" O.D. depending on clip and series specified. One cable or hose per clip. Available with one, two or three clips per trolley. Refer to pages 10 and 14 for more information.

## Series C40-F, C50-F and C60-F

Designed for flat cable with 6.5" maximum cable width, depending on series. Will hold multiple flat cables as long as stacked width does not exceed 6.5" and overall stack height is not greater than 2.3". See pages 12, 16 and 21 for more details.

## Series C50-M and C60-M

Designed for mixed load...a combination of hoses and round or flat cables with overall package width of 8.5" or less. Diameters of all hoses or round cables or height of flat cables in package must not vary more than 0.25". Hoses or round cables may not be stacked. See data on pages 19 and 24.

**Track•Master™ Festoon Systems** are available in three sizes, as shown above, and with either clips for round cables/hoses (series C40-C and C50-C only), cable clamps for flat cables (series C40-F, C50-F, and C60-F), or specially designed clamps for holding a mixed load of hoses, round cables and flat cables (series C50-M and C60-M only). See complete technical data in this catalog.

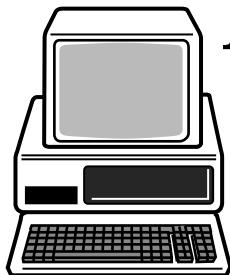

A typical system consists of an end clamp which secures the cable or hose at the non-moving end, a tow trolley or control unit trolley which is moved back and forth manually or by a machine, and a series of intermediate trolleys supporting the cable or hose. The quantity of intermediate trolleys is determined by two factors; the travel distance of the system and the depth of the cable or hose loops. The trolleys roll smoothly in a specially formed "C" shaped track.

# Let Us Recommend a System Based on Your Data ...

Gleason's sophisticated computer program selects the appropriate festoon system based on data contained in this catalog as well as information supplied about your specific requirement. Local factory sales representatives have this program and are available for prompt response to your festoon needs. Please use the work sheet inside to transmit all required data. Send or fax the form to your local Gleason representative or directly to the Gleason factory.

## WARRANTY

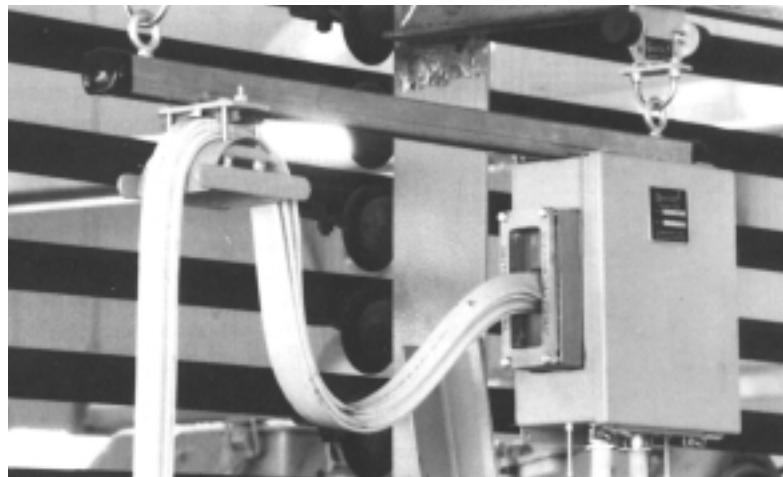

Gleason warrants for a period of twelve (12) months after date of shipment, all goods manufactured by it to be free from defects in material and workmanship. If, within such warranty period, any such goods are proved, to Gleason's satisfaction, to be defective, such goods shall be repaired or, at Gleason's option, replaced f.o.b. Gleason's factory, without charge. Gleason's obligation hereunder shall be confined to such repair or replacement and shall be further conditioned upon Gleason receiving written notice of any alleged defect within 10 days after its discovery and, at Gleason's option, the return of the alleged defective goods to Gleason, f.o.b. its factory.

The foregoing warranty shall not apply to goods not manufactured by Gleason, or to goods which shall have been repaired or altered by others than Gleason so as to, in Gleason's judgement, adversely affect the same, or which shall have been subject to other than normal use of service, negligence, accident, or improper maintenance care, or storage. With respect to goods furnished but not manufactured by Gleason, the warranty obligations of Gleason shall in all respects conform and be limited to the warranty extended to Gleason by the supplier.

The foregoing warranty is in lieu of all other express or implied warranties (except of title) and of all other obligations of Gleason.

# Typical C-Rail System

**GENERAL LAYOUT • DEFINITIONS • DESCRIPTIONS • TERMS • SYMBOLS**

## SYSTEM IN STORED POSITION

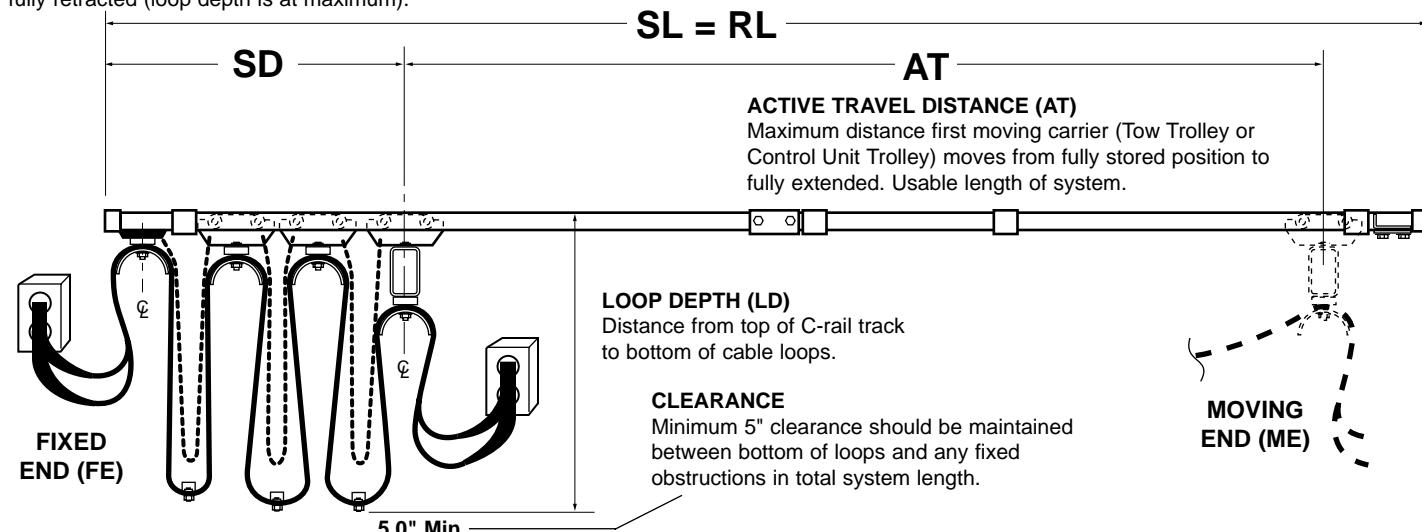

### MINIMUM STORAGE DISTANCE (SD)

Horizontal area required for storing system when fully retracted (loop depth is at maximum).

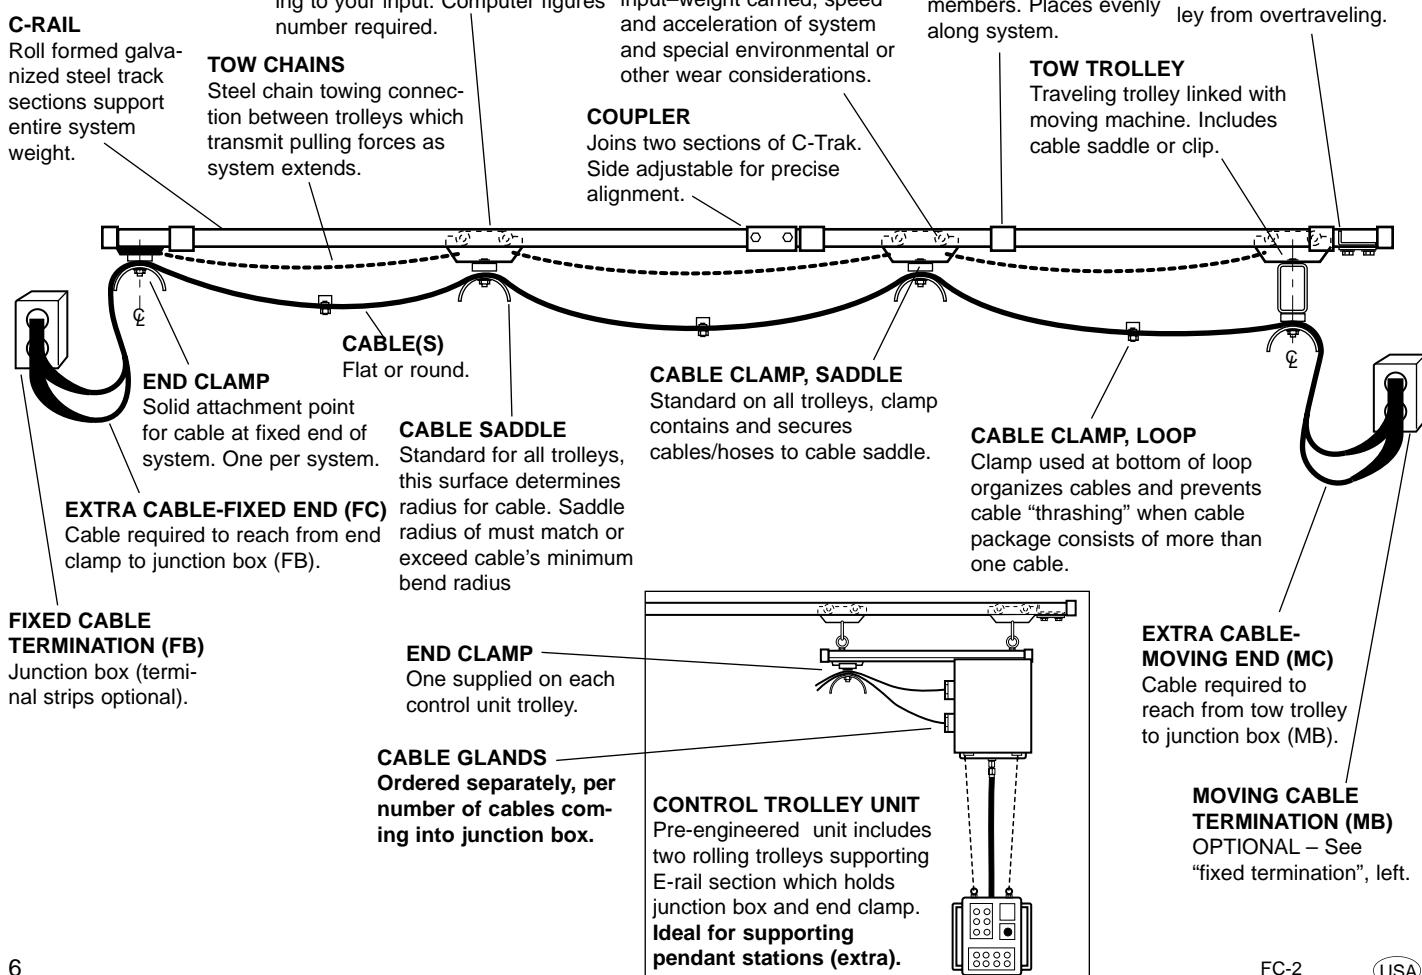

### TOTAL SYSTEM LENGTH (SL)

Equal to total RAIL LENGTH (RL).

$$SL = RL$$

## SYSTEM IN EXTENDED POSITION

# Track•Master™...Built to Last

Precision engineered components and high quality finishes make Gleason  
Track•Master Festoon Systems smooth running and long lasting.

## Running Gear

Steel standard. Bronze or stainless steel available.

## C-Rail

Galvanized Standard. Stainless steel optional on C40 systems.

## Trolley Body

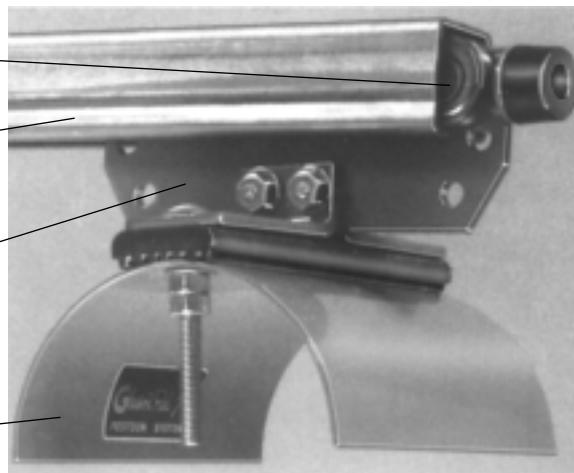

Standard finish is baked on orange polyester powder coating.

## Saddle

For flat cable or mixed bundle. Standard finish is baked on orange polyester powder coating.

## Clip

For hose or round cable.  
Standard finish is zinc plating.

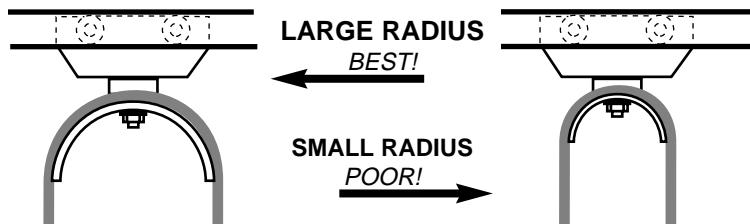

## Cable & Saddle Guidelines

### 1. Bending Cable (All saddles and clips)

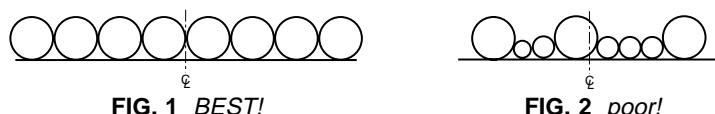

For good service and long life, it is best to follow the rule:  
"BIG BENDS ARE BEST". Cable producers vary in applying a multiplier. Gleason uses the chart below.

| CABLE O.D..   | MIN. RADIUS | MIN. SADDLE DIA. |
|---------------|-------------|------------------|
| Under 0.3 in. | 3 x O.D     | 6 x O.D.         |
| Under 0.5 in. | 4 x O.D     | 8 x O.D.         |
| Above 0.5 in. | 5 x O.D     | 10 x O.D.        |

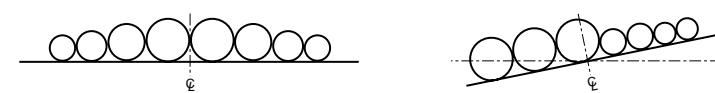

### 2. Cable O.D. Variations (Type M saddles)

Variations in cable size (O.D.) should be kept to a minimum. Clamp is most effective when all cables/hoses are the same O.D. or close as in figure 1. This ensures secure clamping. Wide variation in O.D. (Fig. 2) makes clamping difficult and cable/hose may not remain secure on the saddle.

### 3. Balance in Loading Cable (Type M saddles)

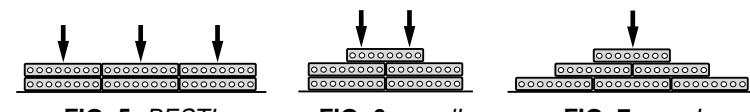

This is important for smooth running, long bearing life and component alignment. Distribute the load evenly, with the heaviest cables nearest the centerline.

### 4. Flat Cable Stacking (Type F saddles)

#### a) Secure Clamping

EXTREMELY IMPORTANT: At least 50% of the cable surface must be under clamp pressure.

#### b) Height Consideration

Flat cable stacking is best when width is 3 or 4 times height (Fig. 5 & 6, above). High stacking can work as long as equal pressure is applied to all cables (Fig. 8).

#### c) Configuration

BIG CABLE ON TOP (Fig. 9) provides maximum bending radius for largest cables, improves heat dissipation for power cables and transfers pulling force to largest cables when tow chains are not used.

# Input Required when Ordering

The following information is required so the Gleason computer software can recommend and quote the ideal festoon system for your application. Enter the data on the form at right and fax to your local Gleason Representative or directly to the Gleason factory at 920-387-4189.

**CABLE/HOSE PACKAGE:** Properly sizing a festoon system for the cable/hose it will carry is the only way to assure satisfactory operation and long life. Please fill in all known information about each size and type of cable or hose to be carried by your system. The information for the grey areas will be computer generated based on your input and published industry averages. Compare the cable/hose you will be using with the "[Cable & Hose Data](#)" in the back of this catalog. If the cable or hose you will be using is unusual in any way, insert the proper data as provided by the cable/hose manufacturer in the appropriate blanks within the grey area. This is especially important for *minimum bend radius* and *weight*. Refer to "[Cable & Saddle Guidelines](#)" ([Page 7](#)) for bending and stacking information.

**OPTIONS:** Included are such items as type of tow device (tow trolley for machine pull is standard...control trolley unit for hand pull is optional), running gear wheel material (steel is standard...bronze and stainless steel optional), hardware material (zinc plated steel standard...stainless steel optional). Enter options desired at right. If blank, standard is assumed. See [page 27](#) for these and other options.

**ACCESSORIES:** Make your system more functional with custom accessories ([Pages 28 & 29](#)). Some accessories such as cable clamps and tow chains will be computer recommended based on application. Where appropriate, all will be automatically sized to fit your system. Enter accessories desired on form at right.

**Gleason also manufacturers I-Beam Festoon systems in a complete range of sizes and capacities. While there is some capability overlap with track systems, I-Beam festoons tend to support heavier loads for longer distances at higher speeds. For more information on Gleason I-Beam Festoons, ask for Catalog "FB".**

# Options Available

Options are available for most typical festoon requirements and many truly special situations. These pages list a few of the most commonly requested options. If you don't see what you need, **JUST CALL!**

## 1. Other Wheel Materials

Wheel materials are listed on each system series "spread" (i.e. Series C50-F on page 18) by specific item.

## 2. Stainless Steel Hardware

Available on all series as noted on series spread.

## 3. Finishes

### STANDARD FINISH

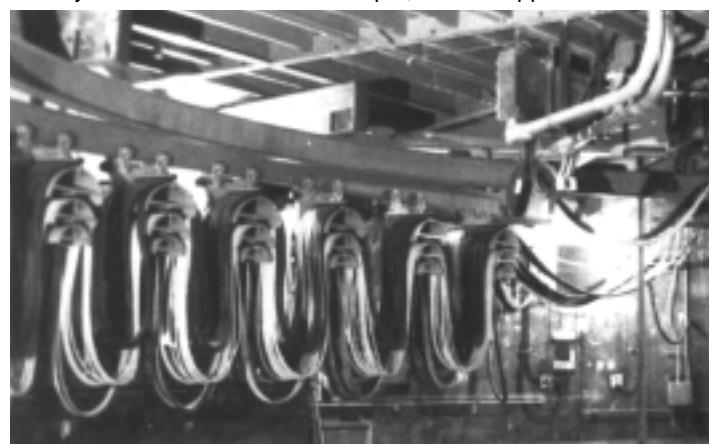

Standard Gleason finish is thermoset polyester powder coating. Independent laboratory salt spray test results indicate our standard finish shows no sign of corrosion at 288 hours vs. hot-dipped galvanized finish, which failed at 168 hours under identical conditions. Standard color is "safety orange".

### OTHER FINISHES

Other finishes may be specified to suit unique conditions. When specifying other finishes, please provide detailed specifications, as finishes tend to be a localized matter to satisfy local conditions. For example, inland suppliers may not easily identify coastal spec, etc.

## 4. Curved Festoon Systems

Festoon systems for curved applications require special attention. Please contact us with your specific need. See photo at right.

*Heavy duty festoon system modified for travel on a curved I-beam. Note two additional saddles on each trolley to handle large number of cables.*

## 5. Non-standard Designs

Non-standard designs are available to meet your application requirements. Contact us with specification details.

## 6. Pre-assembly and Shipping Frame

Gleason offers complete factory pre-assembly of your festoon system. Experienced personnel will assemble all of the system components into their proper operating relationships. This reduces on-site installation time costs and possible installer confusion.

Your system will be shipped to you mounted on a shipping frame which is designed to allow your installation crew to transfer the components directly onto your C-Rail.

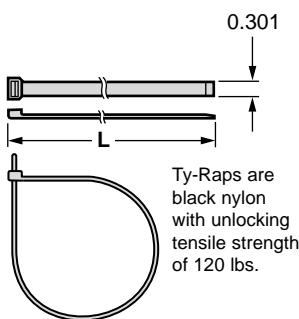

# Accessories

## NO NEED TO SEARCH FOR THE CORRECT ACCESSORY MODEL!

When the Gleason festoon computer program elects a system, you simply indicate which accessories you desire and the correct model number will be selected for you and identified on the OUTPUT page.

| C60 - CP - Z | 6.25     | 2.39    | 2.39     |

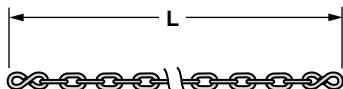

May be supplied with stainless steel hardware.  
Substitute "S" for "Z" in model numbers above.

## Series C50, C60

### Tow Chain

| MODEL NUMBER  | HARDWARE OPTION   |
|---------------|-------------------|
| TC - □□.□ - Z | Zinc Plated Steel |
| TC - □□.□ - S | Stainless Steel   |

Substitute desired length in FEET for "□.□" to complete Model Number. Round up in half-foot increments.

Tow Chains are straight-link No. 2/0 machine chain with zinc plate finish. Standard hardware is zinc plated steel. Load limit is 350 lbs.

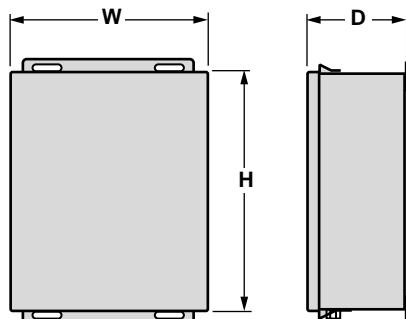

### Junction Box WALL AND RAIL MOUNTED

| MODEL NUMBER    | RATING  |
